WORK EXPERIENCE

Jun 2021—Dec 2021 (Contract)

Maviance | Germany: Lead Front-End Engineer

Developed the user interface for a cross-border payment platform (www.qlipay.de) that connects directly to local utility companies and mobile money across the globe which has enabled thousands of migrants to pay for utility bills, products, and services for their families around the world, in real-time and at a low cost.

Dec 2020 – Apr 2021

Freelance

Working together with a UI/UX designer, I built a new website for Cocoa Processing Company Ltd., one of the leading manufacturers of chocolates in West Africa.

<https://www.goldentreeghana.com/>. This boosted their brand visibility and awareness. In addition, I helped start-ups get their websites up and running.

Jul 2019 – Aug 2020

Haefele Software | South Africa: Full-Stack Engineer

Identified areas for modification and improvements and introduced the team to the essence of assets optimization, code splitting, and lazy-loading components, and within a short time, my team Successfully modified numerous software applications ranging from E-commerce to agency websites, that reduced loading time and increased user experience by 60%.
